Set type**

Electric actuator

KBX SERIES

Variations are made unlimited simply by rearranging standard parts.

Easy construction of orthogonal transport systems to match a variety of processes.

Electric actuator

- Complete with axes of various sizes.
- Max. load capacity 250 kg (ball screw drive).
- Max. stroke length 4,450 mm (timing belt drive).
- Use a no lubrication sealant to make it a long term maintenance-free unit.

Controller

- Connect single axis controllers with link cables to make a multi-axis controller.
- High tact, max. 4 axes simultaneous control, and complex sealing available.
